

AMENDMENTS TO THE CLAIMS

1. **(Currently Amended)** A COS treatment apparatus for a gasified gas containing H₂S, H₂O, O₂, and CO, which comprises:

an O₂ removal catalyst for accelerating the following reaction:

said O₂ removal catalyst being a TiO₂ catalyst carrying Cr₂O₃ or NiO; and

a COS conversion catalyst located on ~~the~~ a downstream side of a gasified gas flow with respect to said O₂ removal catalyst.

2-3. **(Cancelled)**

4. **(Original)** The COS treatment apparatus according to claim 1, wherein said O₂ removal catalyst is located in a higher-temperature region with respect to said COS conversion catalyst.

5. **(Currently Amended)** A COS treatment method for a gasified gas containing H₂S, H₂O, O₂, and CO, ~~which comprises~~ the method comprising:

~~a first step of removing O₂ from the gas by reaction with H₂S and CO, using a TiO₂ catalyst carrying Cr₂O₃ or NiO to accelerate the following reaction:~~

~~a second step of converting COS to H₂S.~~

6-7. **(Cancelled)**

8. **(Currently Amended)** The COS treatment method according to claim 5, wherein said ~~first step~~ said removing O₂ from the gas is performed at a higher temperature with respect to said ~~second step~~ converting COS to H₂S.
